Molecular-line survey footprints on M33

instrument	beam	pixel	sky extent	reference
IRAM 30 m	12″ · 50 pc	3.0″	R < 7 kpc	Druard 2014 / Corbelli 2017
IRAM HERA	12″ · 50 pc	3.8″	R < 8.5 kpc	Gratier 2010
BIMA	13″ · 50 pc	4.0″	Hα disk	Engargiola 2003
FCRAO 14 m	50″ · 204 pc	22.1″	r < 15′	Heyer 2004
NRO MAGiC	19.3″ · 81 pc	7.5″	30′ × 30′	Tosaki 2011
BIMA+FCRAO	13″ · 53 pc	--	R < 5.5 kpc	Rosolowsky 2007
ALMA-ACA	7.3″×6.5″ · 30 pc	--	1100″ × 1180″	Muraoka 2023 / Konishi 2024

DSS2 Red. Footprints drawn from each paper's stated coverage; adopted disk geometry PA = 22.5°, i = 56°, D = 840 kpc (BIMA at its own PA = 21°, i = 51°).
Legend gives each map's beam and its pixel/grid spacing as quoted in the paper; "--" where the paper states none.
Shapes are schematic representations of the quoted areas — the NRO and ALMA-ACA rectangles are drawn centred and axis-aligned. Single-GMC ALMA pointings (Tokuda 2020, Muraoka 2020, Kondo 2021, Sano 2021) and the CARMA outer-disk fields (Bigiel 2010) are ≲1′ across and are not drawn.
